

iN setup instructions for Internet Explorer 10 and 11

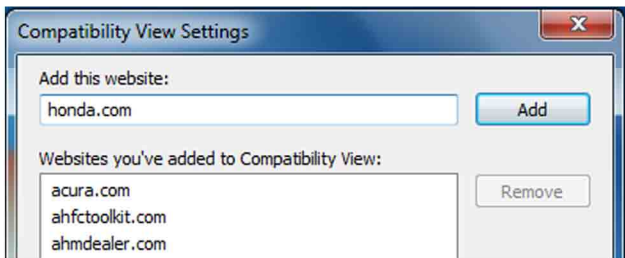

- 1 First *right-click* the gear icon on the top right of Internet Explorer and select **Menu bar**.

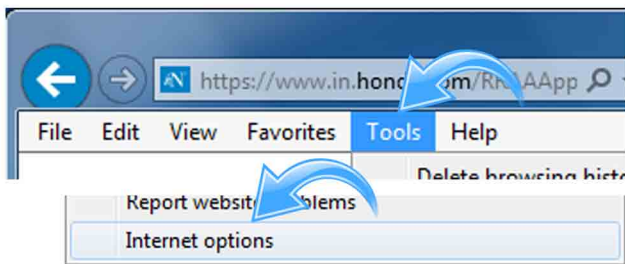

- 2 Select the **Tools** menu and then **Compatibility View Settings**.

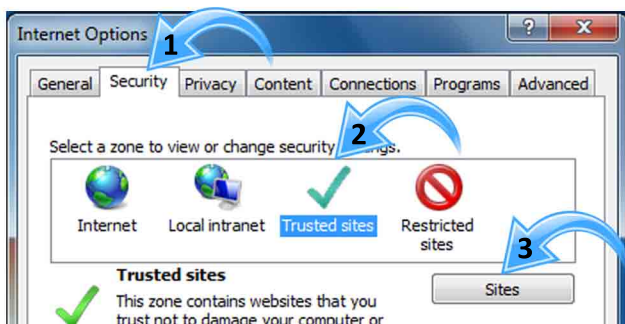

- 3 Under **Add this website**, add honda.com, acura.com, ahmdealer.com and ahfctoolkit.com. Then click **close**.

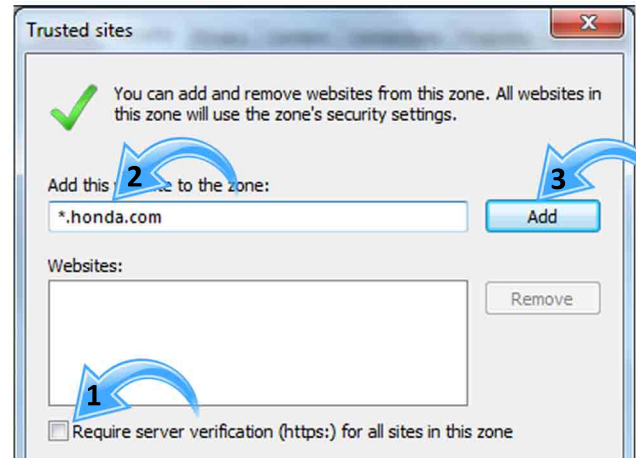

- 4 Select the **Tools** menu and then **Internet Options** at the bottom of that menu.

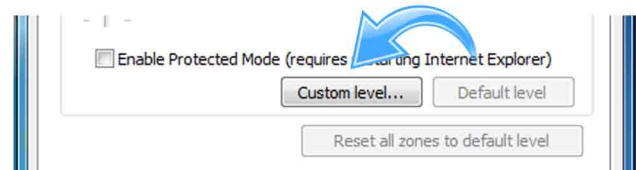

- 5 Select the **Security** tab and then select the green check-mark for **Trusted Sites**. Then select the **Sites** button.

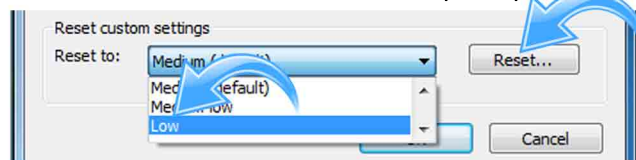

- 6 Uncheck **Require Server Verification**. Then add *.honda.com and *.ahfctoolkit.com.

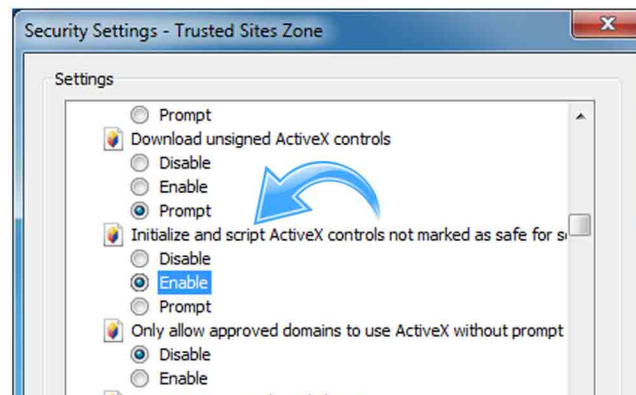

- 7 Click on **Custom level** under **Trusted Sites** at the bottom of the **Security** tab.

- 8 At the *bottom* of the **Custom Level Settings** click the **Reset** to drop-down menu and select **Low**. Then click the **Reset** button. Click **Yes** to the confirmation prompt.

- 9 Scroll down in the list of options to **ActiveX Controls and Plugins**. In that section **Initialize and Script ActiveX Controls Not marked for safe** needs to be enabled. Then click **OK** to all windows. Click **Yes** if prompted.

- 10 Restart Internet Explorer and go to the iN.
